

Instruction to use this learning space
Designing your ideal Energy Saving House

This learning space consist of two areas of two areas

1. The blue area on the right – Resource area
2. The green area on the left – The play field

The resource area contains drag and drop objects. Drag the object, one at a time into the play field.
Once the objects are in the play field, their properties can be changed by double clicking on it.

Property bar will pop up when object is double clicked.

The object can be resized, rotated or flip.

If the object is not needed it can be deleted by clicking on the delete button

Once you are happy with your arrangement, give reasons why your house is arranged as shown above.
Discuss with your friends in other groups and present it in class.

Use the print-sysrq button to capture your arrangement and paste it in PowerPoint to present.
